Biopharmaceutical Contract Development and Manufacturing

The Contract Development and Manufacturing Organization (CDMO) market is expected to reach 105 bn USD by 2021. Although 90% of the market is still dedicated to small molecules, the market growth of biologics is outpacing its small molecule counterparts. This talk will provide some insights into the biopharmaceutical CDMO industry; its current and future business models, technological trends, and career opportunities.

The presentation is followed by an aperitif and - for a limited number of students - by a dinner with the speaker. For the dinner, contact thomas.grabinger@uzh.ch not later than May 23, 2018 by explaining why you would like to meet the speaker.
