

VISION 2020 - A PERSONAL PERSPECTIVE AGING

Thursday, February 6, 2014, 17:00h
Lecture Hall Y16 G05
University of Zurich, Irchel Campus
Prof. Dr. Adam Antebi
Director of the Max Planck Institute for Biology of Ageing
Cologne, Germany

Novel approaches towards healthy aging: enhancement of protein quality control

Protein quality control mechanisms tend to fail with age, causing protein aggregation, proteotoxicity, and neurodegeneration. In the worm *C. elegans* endogenous hexosamine metabolites stimulate natural protein quality control mechanisms leading to extension of life.

The presentation is followed by an aperitif and - for a limited number of students - by a dinner with the speaker. For the dinner, contact melroyxavier.miranda@uzh.ch not later than February 4, 2014 by explaining why you would like to meet the speaker.

Organization:

This event series is organized by a committee of PhD students of the PhD Program in Integrative Molecular Medicine (imMed), UZH: *Institute of Physiology*: Marta Figueiredo (chair) | Jerry Fuady | Julia Jando | Melroy Miranda

Supported by the SUK Program "Doktoratsprogramme"
