

VISION 2020 - A PERSONAL PERSPECTIVE AGING

Thursday, November 21, 2013, 17:00h
Lecture Hall Y16 G05
University of Zurich, Irchel Campus
Dr. Jamie Barger
COO of LifeGen Technologies
Madison, WI, U.S.A

Nutrigenomic approaches to slowing the aging process

Do you want to know more about the genetic of aging and its retardation by caloric restriction? LifeGen Technologies utilises DNA microarrays to identify aging-associated changes in gene expression and how these are opposed by caloric restriction (CR).
Join us for this interesting talk, in which basic science collides with applied science!

The presentation is followed by an aperitif and - for a limited number of students - by a dinner with the speaker.

For the dinner, **please register by e-mail** to jerry.fuadyhartanto@uzh.ch not later than November 19, 2013 by explaining why you would like to meet the speaker.

Organization:

This event series is organized by a committee of PhD students of the PhD Program in Integrative Molecular Medicine (imMed), UZH: *Institute of Physiology*: Marta Figueiredo (chair) | Jerry Fuady | Julia Jando | Melroy Miranda

Supported by the SUK Program "Doktoratsprogramme"
